## THREE V ENTERPRISES ANNOUNCES PHILANTHROPIC PROGRAM

*Program waives fee for Non-Profit Organizations to Submit into the GAVA International Design Competition at [www.gavaawards.com](http://www.gavaawards.com)*

(Las Vegas, NV) Three V Enterprises (3VE), a corporation devoted to developing platforms to honor, educate and inspire architects, designers, builders, manufacturers, and developers worldwide announces the organization's commitment to enhance philanthropic endeavors worldwide.

Three V Enterprises, hosts of *GAVA: the Global AquaTecture Visionary Awards*, will waive the entry fee providing complimentary entries for non-profit organizations to submit their water-themed projects into the annual international competition. GAVA recognizes artisans globally whose visions and creativity exemplify the best in *AquaTecture; the discipline of designing, engineering and erecting of water environments and ancillary components, in a harmonious nature with consideration to function, space and aesthetics.*

A vital component of society, non-profit organizations provide a variety of services, educational opportunities and support systems internationally. Most do not have discretionary funds to submit projects to awards competitions, especially in today's economy.

"After careful consideration and reviewing numerous options, the executive team determined this program to provide *the greatest impact on a global scale,*" notes Three V Enterprises co-founder Virginia Martino. "Companies rely on awards and publicity to bring notoriety to their organizations, so too is the case for non-profit agencies."

To qualify for fee exemption, organizations must validate their status by providing a not-for-profit license or certification number such as a 501 (c) 3, along with their entry submission into any of the many categories including pools, spas, water features, waterfalls, reflection ponds, koi ponds, animal habitats and water fountains. A review committee will evaluate each submission on a case-by-case basis.

The exemption would extend to any entity operated by a non-profit group, such as a religious building, educational institution, fitness center or popular attraction site such as museums aquariums, animal parks and zoos.

Support from GAVA sponsors Structure Studios, Zodiac Pool Products, Brand, Ltd., Paramount Pool and Spa Systems and Pebble Technology, Inc, allows Three V Enterprises to provide this philanthropic program on such a vast dimension.

For more information about GAVA and to enter the 2010 competition, go to [www.gavaawards.com](http://www.gavaawards.com) .
